

When I signed on to XM a while back, I got more than expected, both in quality and selection. XM has more than kept it's end of the bargain with me, and now that it offers weather and other usefull information, it's more than great, IT'S NECESSARY! I don't listen to AM or FM as much any more, they dont have the quantitiy and quality of information available on XM. I really don't think that anybody has the right to tell me what to or not listen to. I pay for the exclusive services that XM provides, I have the right to. The NAB should stay out of my listening preferences!

It's the rigt of the people to be informed.

I URGE THE FCC TO REJECT THE NBA PETITION 04-160, I PAY FOR THESE SERVICES AND RELY ON THEM TO, THANK YOU.
